Education

Indian Institute of Information Technology, Sonapat

August 2023 – 2027

Bachelor of Technology in Information Technology - CGPA: 8.68 (Till 5th Semester)

S S K L A Bal Vidya Mandir

Class XII-CBSE - 90%

Projects

Nexus - Real time Flutter Chat Application GitHub

- Built **full-stack messaging platform** with **Flutter** and **Firestore**, achieving **<100ms message latency** via **Firestore's native WebSocket-based synchronisation** and handling **100+ concurrent connections** with secure **Firestore authentication** and **Flutter UI**.
- Reduced codebase by **30%** using **Flutter's declarative UI** and **Provider state management**, implementing **Firestore DI/Services** across **30+ Dart files** for scalable, testable code.
- Engineered **offline-first architecture** using **Hive local caching**, ensuring **100%** data availability via **Firestore Offline Persistence** with automative background sync for real time messaging.
- Secured application via **Firestore Auth** with **OTP-based verification** and **granular Security Rules**.

MedGen.AI - AI-Powered Medical Documentation Analysis System GitHub

- Developed a full-stack medical AI application using **Next.js**, **React**, **TypeScript**, and **FastAPI** to automate clinical documentation analysis with **3-8 second** processing time.
- Implemented AI-driven diagnosis system using **DistilBART** for summarization and **Sentence-BERT embeddings** with **FAISS vector database**, achieving **87%** average confidence scores across **12+** medical conditions.
- Architected **RESTful API** backend handling medical note processing, vector similarity search across **173+** document chunks, and returning top **5** ranked diagnoses with full traceability.
- Integrated local AI models (**DistilBART**, **all-MiniLM-L6-v2**) for **100%** offline processing ensuring **HIPAA** compliance and data privacy without external API dependencies.
- Deployed knowledge base covering **12** critical conditions (Heart Failure, Pneumonia, Diabetes, COPD, Stroke, etc.) with citation-backed recommendations for clinical decision support.

TrioFeed - A Flutter App GitHub

- Architected triple - app** food delivery ecosystem using Flutter,Bloc-driven reactive Streams for real-time synchronization, achieving **Fluid UI**,across **10 + screens** for Customrs,Restaurent,Delivery roles.
- Built declarative Flutter UI** with **4 category filters**, dynamic search, and lazy-loaded lists handling **50+ items at 60fps**, reducing codebase complexity by **40%** via Bloc state management.
- Designed a mock-first architecture** with Repository pattern and **Dart Streams** ,enabling **100% UI/UX** validation and feature-complete testing without backend dependencies.

Achievements

Our Team **Hackaholics** won the **Best Revenue Model Award** at **Hack The Winter** Hackathon , organised by Graphic Era Hill University.

Secured **1st Place** in **India Funnel at ICP - World Computer Hacker League(WCHL)** , Global Blockchain Hackathon.

Secured **2nd Position** in **Ideathon Tech Crisis Challenge 2025** ,organinsed by **IIIT Delhi**.

Qualified for **Final Offline Round**, **Odoo India Hackathon** ,organised by **Odoo Inida**.

Technical Skills

Languages: Java,Dart,C++, SQL, C, JavaScript, HTML/CSS

Flutter Development: Flutter , Flutter SDK, Declarative UI, FMM , Clean Architecture, Dart Streams/Async-Await, Dio, Hive/Isar/Sqflite, *Getit/Injectible, Firestore, BlocStreams*,

Backend and Databases: SpringBoot,, RESTful APIs, MySQL, SQLite3 , PostgreSQL

Coursework: Data Structures, Design and Analysis of Algorithms, Computer Networks, Operating System, DBMS, Computer Architecture,

Cloud & Tools: VS Code, AWS, Git, GitHub, Postman, Figma , Agile/Scrum , Docker

Courses and Certification

Oracle Cloud Infrastructure 2025 Certified Data Science Professional

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

Forward Program - Mckinsey
